

Hach BioTector B3500s TOC Analyser

Effluent TOC monitoring made easy

Semi-annual reagent replacement and seamless integration with the Hach sample homogenisation unit, make the B3500s the easiest solution for regulatory TOC monitoring in municipal wastewater.

Easy sample homogeniser integration

Designed to communicate with the Hach Sigmatex 2 sample homogeniser, the system provides an off-the-shelf solution to meet TOC effluent monitoring regulations.

Extended reagent and maintenance intervals

Every six months reagent replenishment, semi-annual calibration and basic preventative maintenance allows you to focus on what matters most.

Worry-free TOC

With innovative two stage, advanced oxidation technology, the B3500s provides you with reliability and uptime, without sacrificing accuracy.

Reagent costs that don't kill the bottom line

By only needing to replenish reagents every six months, you will see direct bottom line savings in comparison to other systems requiring bi-weekly or monthly replacements.

Part Number	Parameter	Multi-Stream	Measuring range	GBP Price
B5BFAA152AAAS	Direct measurement of Total Organic Carbon, Total Inorganic Carbon, Total Carbon Chemical Oxygen Demand, Biological Oxygen Demand via correlation Volatile Organic Carbon via calculation	1 process stream, 1 grab sample	0 - 25 mg/L C, with exceedance tracking up to 100 mg/L C	Contact Us
