

Be Right™

CA610 Fluoride Analyser

The CA610 Fluoride Analyser uses advanced ion-selective electrode (ISE) technology for continuous monitoring of Fluoride concentration in drinking water effluent. Accuracy is ensured with precise control of temperature, ionic strength, and pH. Interferences that can bias measurements are virtually eliminated with this electrode.

- Reliable, full-time Fluoride monitoring
- Patented electrode design with replaceable tip
- Cost effective operation - ultra-low reagent consumption
- Automatic calibration

| Part Number | Power requirements (Voltage) | Reagents included | Documentation | Measuring range | Detection limit | GBP Price |
|-------------|------------------------------|-------------------|--------------------------|--------------------------|--------------------|------------|
| 5740001 | 100 - 115/230 V AC | Yes | Worldwide, except Europe | 0.1 - 10.0 mg/L Fluoride | 0.10 mg/L 0.10 ppm | Contact Us |
| 5740011 | 100 - 115/230 V AC | Yes | Europe only | 0.1 - 10 mg/L fluoride | 0.10 mg/L | Contact Us |
