

# Portable Parallel Analysers

Water Quality Testing. Dramatically Streamlined.

Portable Parallel Analysers (PPA) from Hach allow you to perform colorimetric and probe-based measurements simultaneously, saving time, reducing variability and with less hassle than the traditional process. By using Chemkey reagents which contain the proven Hach chemistry you know, you can be confident in your measurement every time.

New parameters:

We have launched the following new parameters: Extended range for Total Chlorine (now test up to 10 mg/L), Combined Free and Total Ammonia (free up a port by using one Chemkey to get two different results)\*, High Range Hardness (90 - 750 mg/L CaCO<sub>3</sub>).

Also, the Intellical ORP probe is now compatible with SL1000.

\*Only available as combination package with Monochloramine Chemkeys

## SL1000 Portable Parallel Analyzer (PPA)

The new Hach SL1000 Portable Parallel Analyzer (PPA) performs the same tests with less than half the manual steps. Get highly accurate results, with less opportunity for errors, in a fraction of the time. Up to six parameters, tested simultaneously.

Part Number	Product description	Interface	Battery life
LPV443.99.10002	SL1000 Portable Parallel Analyser (PPA)		>200 Chemkey tests per full battery charge
LPV443.99.20002	Full SL1000 Portable Parallel Analyser (PPA) Kit		>200 Chemkey tests per full battery charge
